FIG. 1

Workstation database interface.
Data components are industry-
specific. The example here uses
an Animal Rescue / Shelter as
the industry case-in-point.

Optional "import" buttons

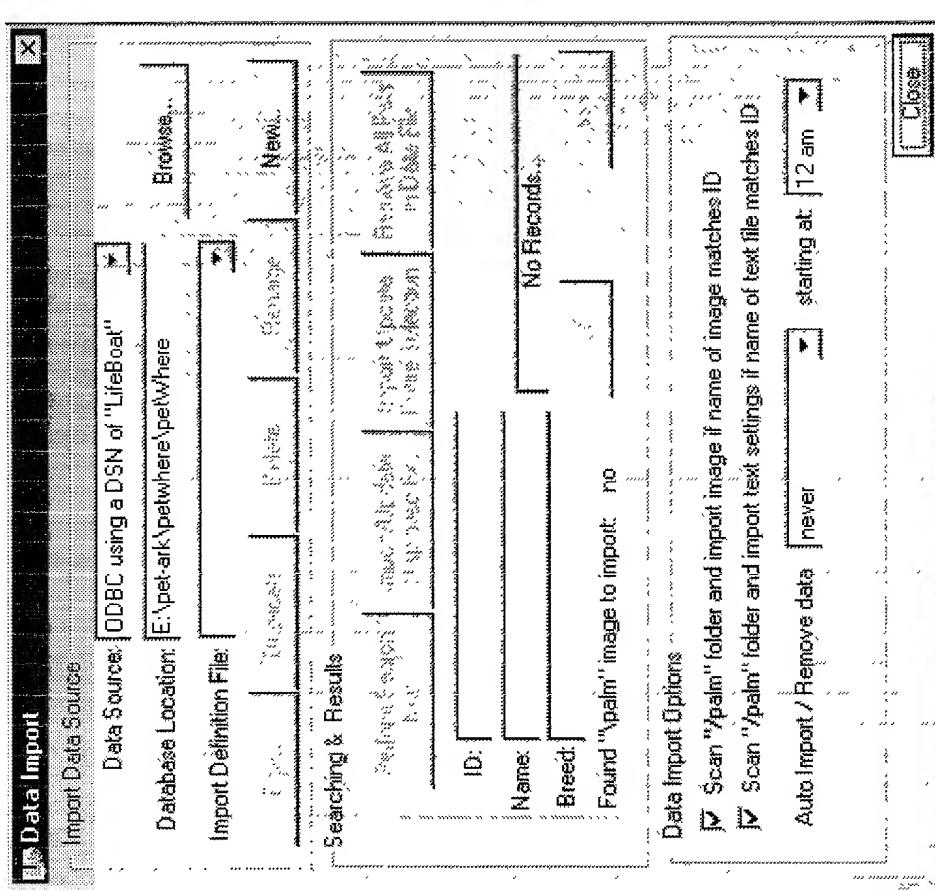

FIG 1A.

file:///E:/pet-ark/docs/patent/lifeboat/import.jpg

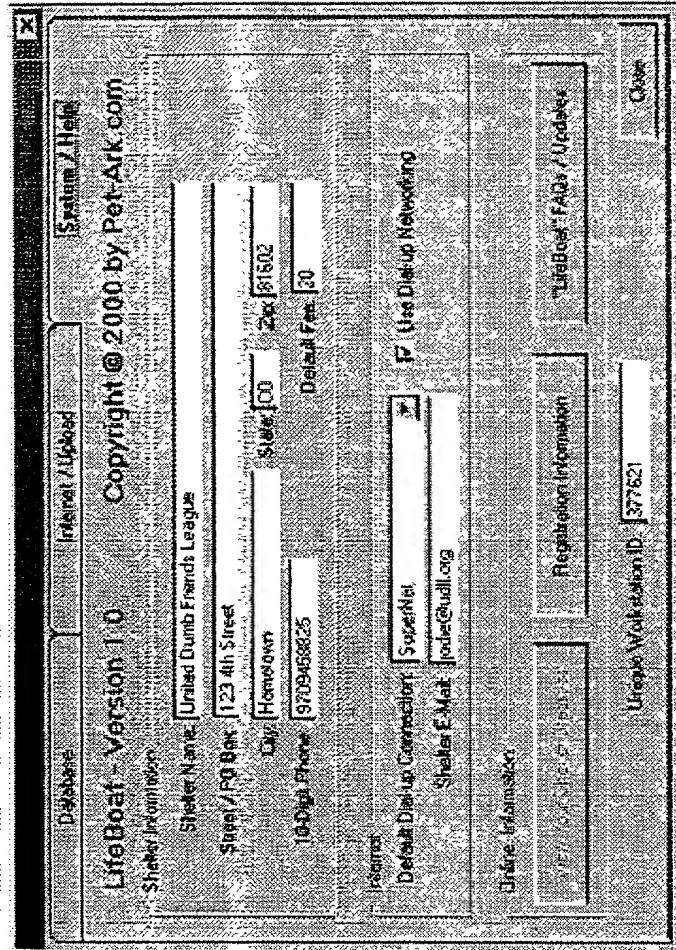

FIG. 2
Unique workstation information
that identifies the workstation to
the online database.

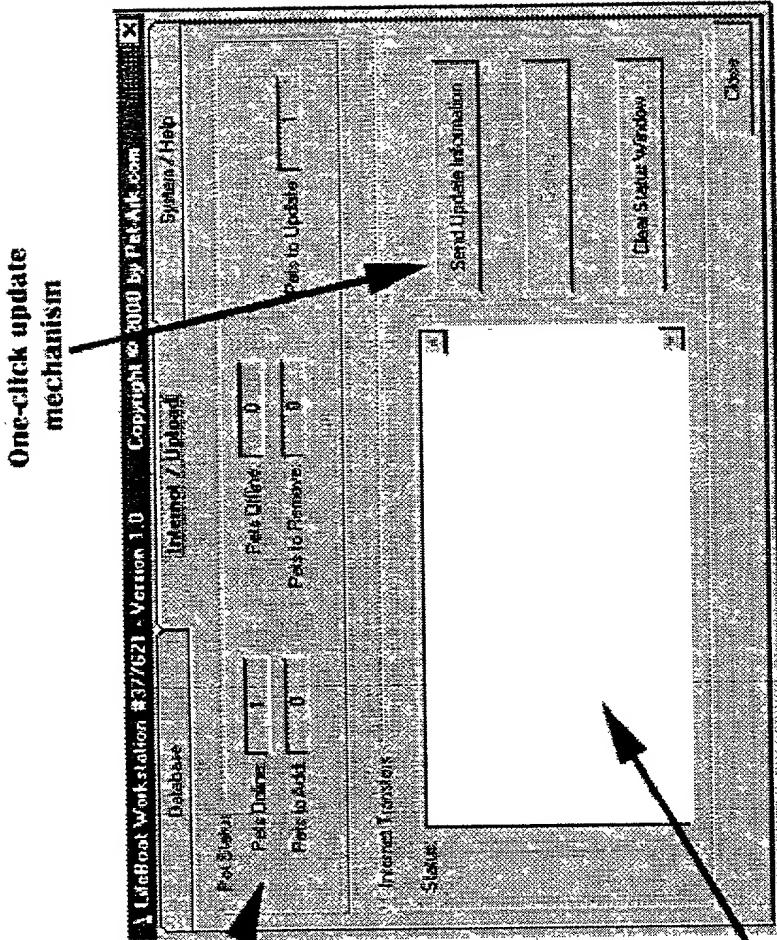

FIG. 3

Online status of all items entered at the workstation and a "one-click" update mechanism.

Internet session display gets updated during an online transfer of all "new" information to the online database

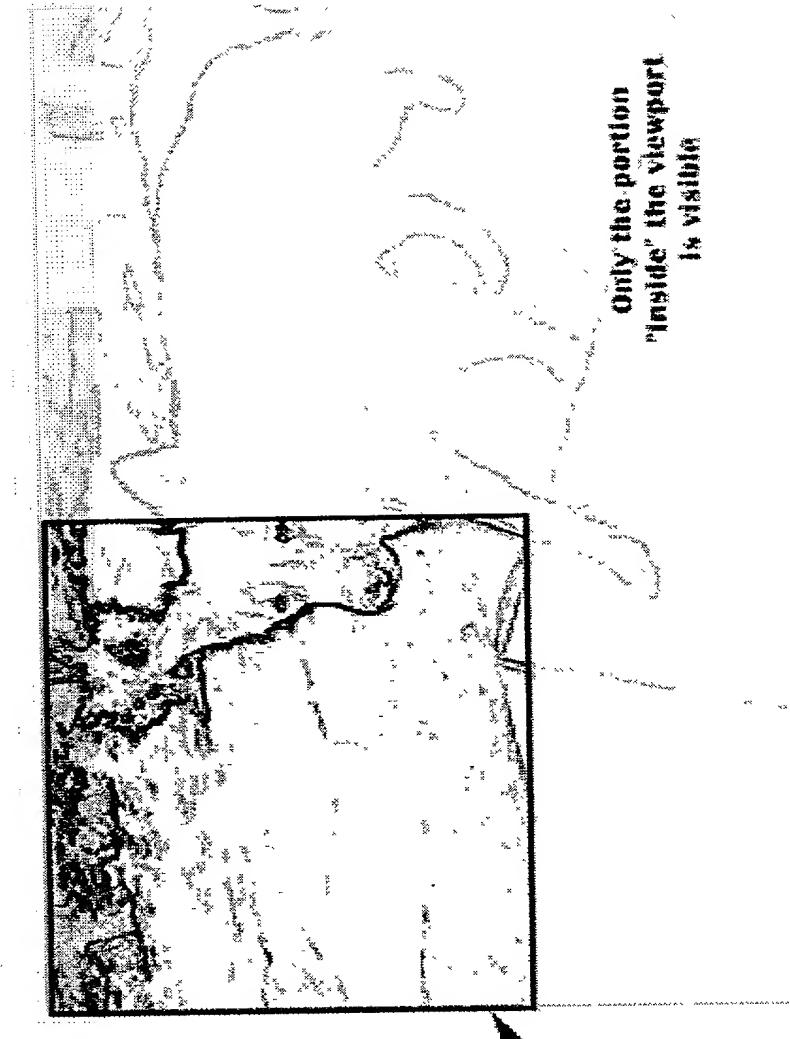

FIG. 4

**Shown here is the
viewport along with
the original digital
image. Currently the
subject is too big and
not centered.**

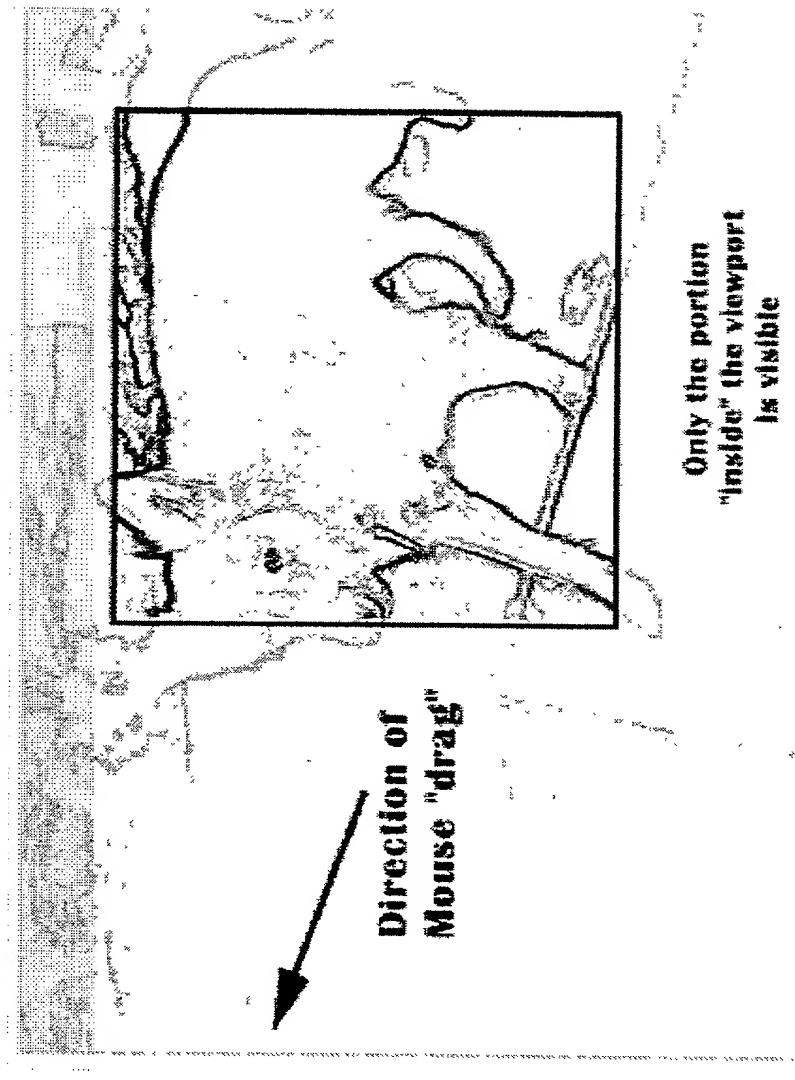

FIG. 5

The image is dragged to quickly center the subject in the **viewport**.

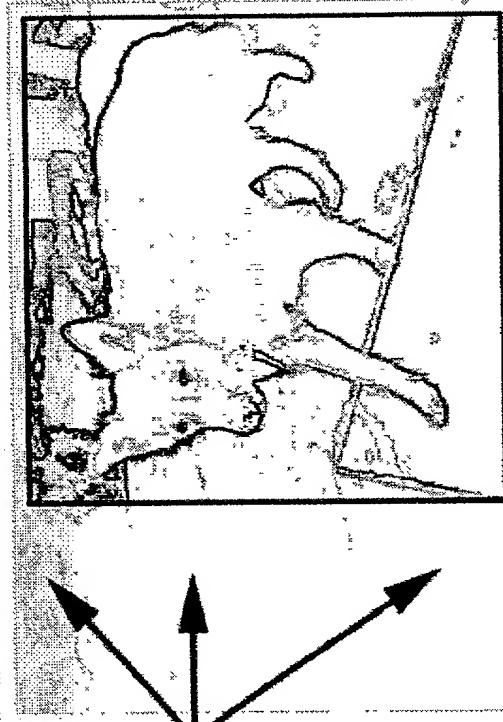

FIG. 6

A few clicks of the "Shrink" button reduces the overall image, and hence the subject, to complete the centering.

One more click on the "Accept" button crops the image to the size of the viewport.

All non-visible areas of the image are discarded upon an "Accept"

"inside" the viewport
is visible

Overall image reduced in size after one or more "Shrink" button clicks

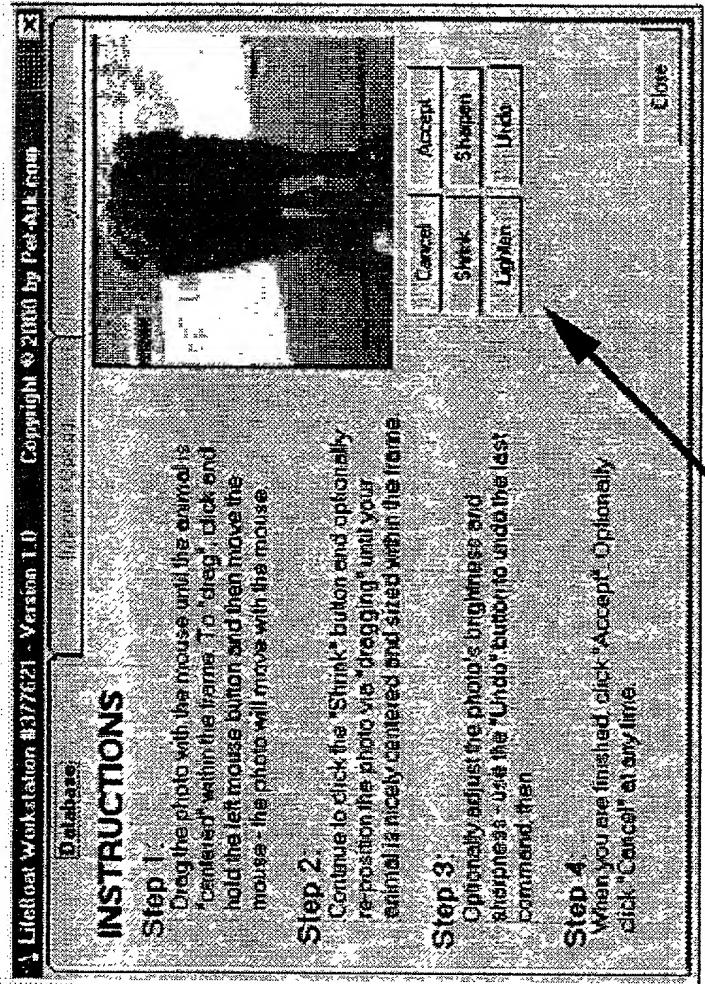

FIG. 7

Optional digital image enhancements are performed via one-click buttons.

**Default image used
for all new Inventory Items**

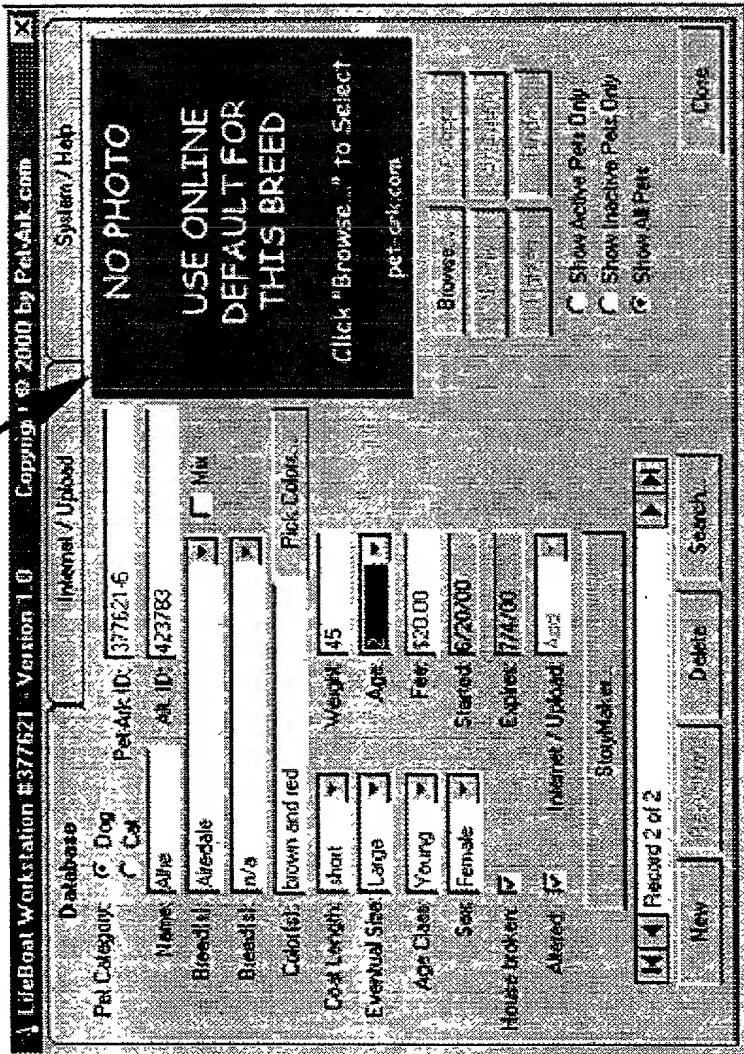

FIG. 8

New entries automatically use
a "default image" until an actual
image of the item is specified.

**Optional representation
of the actual item**

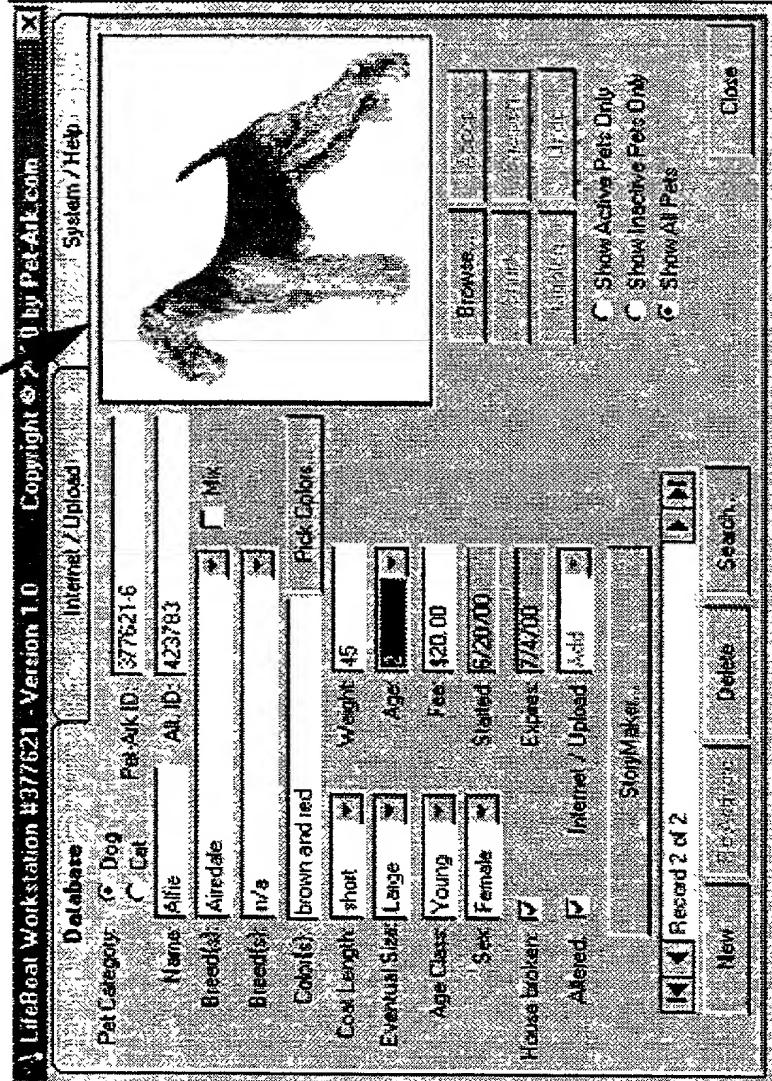

FIG. 9

Optional default image could be a "representation" of the original item.

FIG 10.

Automatic paragraph generation based on data entry and industry-specific interface options.

Options based off of industry-specific descriptors

Bondo is a 15 year old male Belgian Sheepdog mix with a long length black coat. This neutered dog is happy, energetic, and banks. He gets along great with adults only, other dogs, and cats. He is housebroken, and has some obedience training. Bondo is an indoor / outdoor animal that sleeps indoors, and he must have a leashed yard. He is currently living at the shelter due to an injury. If you would like more information on Bondo, call United Dunn Friends League at XXX XXX X or email XXX XXX X.

Select all options that apply to this pet. Click "Generate" to create the auto based off of your input. You may also click "Generate" here after filling in the form.
